Metadata Registration Practice Statement

Version 1.0.0

WAYF operates a hub and spoke federation in Denmark. The WAYF operational team maintains the metadata for the federation hub.

This document describes the registration practices for both Identity Providers and Service Providers, as well as information on metadata aggregation for eduGAIN.

Identity Provider Practices

Identity Provider Registration Practices

WAYF serves public organizations, e.g.:

- Universities
- University Colleges
- Upper secondary schools
- Public schools
- Research institutes
- Libraries
- Governmental agencies and departments
- Danish healthcare regions
- Municipalities and other local authorities

For an Identity Provider to join WAYF, the following requirements must be met:

- The Identity Providers must sign a “Data processor contract” with WAYF.
- The Identity Providers must deliver a description of their identity management practices, which must as a minimum comply with national Danish it-security requirements.
- The Identity Provider must provide technical and administrative contact information.
- The Identity Providers must have passed technical integration to WAYF.

Identity Provider Registration Practices for eduGAIN

All Identity Providers connected to WAYF are automatically included in eduGAIN, cf. the “Data processor agreement” between WAYF and the Identity Provider.

There are no additional eduGAIN practices for Identity Providers.

Service Provider Practices

Service Provider Registration Practices

For a Service Provider to join WAYF, the following requirements must be met:

- The Service Provider must sign the WAYF Service Provider contract.
- The Service Provider must provide WAYF with a description of the service.
- The Service Provider must provide technical and administrative contact information.
- The Service Provider must agree with WAYF about which attributes are released.
- The Service Providers must have passed technical integration to WAYF.

Service Provider Registration Practices for eduGAIN

The practices below are in addition to the “Service Provider Registration Practices” above:

- The Service Provider must provide eduGAIN compliant SAML 2.0 metadata to WAYF
- WAYF will only publish metadata to eduGAIN for Service Providers that are connected to the WAYF production environment
- The Service Provider must explicitly request WAYF to be listed in the eduGAIN metadata
- The metadata for the Service Provider is published by WAYF. Service Providers can request an update of their metadata by contacting WAYF operational team at operations@wayf.dk

WAYF Metadata Aggregate

WAYF maintains an aggregate of all metadata it exposes to eduGAIN on the following location:

<https://metadata.wayf.dk/wayf-edugain-metadata.xml>

The metadata document signature can be validated using the following X.509 certificate:
